ABSTRACT

Objectives of this research were : 1. to study theories about the measure as a park 2. to analyze the condition and problems of management measures for Educational Park in Saraburi and 3. to offer. development of the park is a measure of the offense. The methodology of research combines methods (Mixed Methodology Research) based on the qualitative and quantitative data that are supporting the findings more clearly. For the research Qualitative Research The study focused on the concept papers and research. Depth interviews (In-depth Interview) from the data. And quantitative research by questionnaires (Survey Research) on development issues management model to measure the Educational Park in Saraburi. Data were analyzed with descriptive statistics By percentage, average, and standard deviation.

Findings were as follows:

1. The general condition of the park is a study in Saraburi inquiries from the general condition of the park is a measure of the offense. The overall high level. The side with the most is the environment, followed by the missionaries. Minimal personnel and the general condition of the park is a measure of the offense. The facilities Action to persuade people around Temple To support the building of the temple every year. The environment Environmental measures are established mainly as a multipurpose building support activities, divided into sections for the missionaries. Event Show preaching to people to learn the principles of Buddha teaching staff of laity, clergy personnel are individuals, government agencies and private organizations realize the importance of developing measures. Management ABB has developed to measure prosperity, peace and stability. Acting as the management of the temple as parents care supervisors instruct monks and lay people in the temple to be tidy in good morals. The general

condition of the park is a study in Saraburi inquiries from the general condition of the park is a measure of the offense. The overall high level. Average of 3.86 with the average in most environments. Average of 4.57, followed by the missionaries. Average of 4.54 is the lowest staffing average of 3.15.

2. Theories about the measure to the park. Management temple abbot must have a science and an art gallery in the administration and management measures. There is science in administration and management include planning, organization. The director of personnel management, coordination, evaluation and budget. The art of management is to manage and contain the lead. Ability to work The art of speaking well. He had to convince both the art and science of management.

3. Development of the park is a measure of the offense. 1) the facilities. The deal is to create a shady retreat clean enough gravity to the people who came to appreciate the religious environment of a second) on the environment. The temple is a shady park, is in line with the study of Buddhist 3) the missionaries. By providing the sermon to the general public, youth, students, schools and agencies to listen to sermons from Temple 4) Personnel by monks within the monastery are competent as a. educate people who are interested in Buddhism. Encourage staff to study measured both secular and spiritual 5) management. ABB has managed to convey the concept of the park is to be determined through activities such as the implementation of the action plan is developed each year in consultation with the clergy in the temple. People both inside and outside the temple. A clear implementation plan together.
